

III. WRITING

(10 POINTS)

The emigration of skilled workers is a real problem for their countries of origin. Write an email to the editor of the web site www.globaldebate.org in which you explain why these people emigrate and suggest ways to encourage them to stay in their own countries.

Dear Sir

I send you this email, so as to talk about one of the biggest problems for any country, which is the emigration of skilled workers or "Brain drain". I also want to explain the reasons why they emigrate and leave their own countries.

In some poor countries, there are not many opportunities of success. So many engineers are jobless, they can accept any job so as to support their families and all that because they can't find the suitable job even if they're well educated, they have a problem finding a source of living and making money. Sometimes, there are no equal opportunities, you can work if you are beautiful or rich, if you're not, you can't work.

So I guess that the only solution to encourage the skilled workers to stay in their countries of origin is to give them the equal rights of having a job, and the opportunities they need, to help them to improve the quality of their families' lives, and that's what the government for, it must provide what young skilled people need.
